

# Email Attachment Ingestion for SAP

## Optima Assets - Solution Package

Email Attachment Ingestion for SAP will process incoming emails in SAP to extract their attachments, store them in a content repository and link them to the corresponding SAP transaction.

### CHALLENGE

Manually attaching documents to SAP transactions can be time-consuming. Users must navigate to the corresponding SAP document in order to manually create each of the attachments.

### WHO IS THIS SOLUTION FOR?

Any company storing attachments into an ArchiveLink-compatible content repository.

### SOLUTION OVERVIEW

This solution package automates the processing of incoming emails in SAP to extract their attachments, store them in an ArchiveLink compatible Content Repository and create the link to the corresponding SAP transaction without requiring any user intervention.

### KEY FEATURES

#### Subject based parsing

It simplifies/automates the indexing process by allowing the sender to specify the SAP Object in the email's subject without requiring to login into any business system.

#### Multiple attachments per email

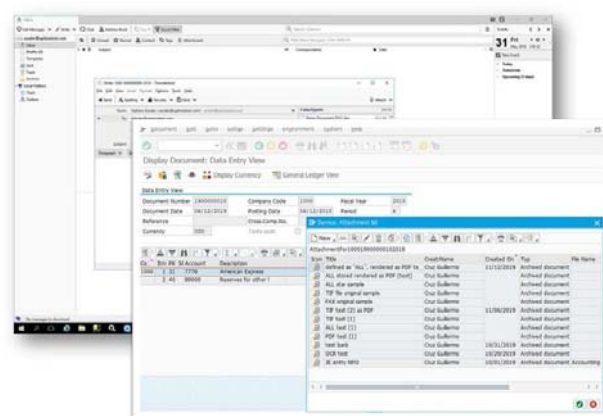

Processing of multiple attachments with multiple attachment types per email is supported.

#### Processing confirmation

The sender receives an email notification confirming the ingestion of the attachments.

#### File extension filter

Attachments can be filtered by extension to prevent the ingestion of any undesired file into the system.

### ABOUT OPTIMA CONSULTING

We provide ECM strategy, design, implementation, and the management of large-scale enterprise content management solutions such as SAP, OpenText, Microsoft & Taulia. With over 60 consultants with average of 15 years around ECM and enterprise solutions we focused in implementing OpenText solutions around Content.
